Dear customer,

On June 1 2006, Akzo Nobel Ink & Adhesive Resins (IAR) was bought by Hexion Specialty Chemicals. Together, they form a new business unit Ink & Adhesive Resins within the division Performance Products & Inks of Hexion Specialty Chemicals.

A result of this integration is that the entire product portfolio of the former Akzo Nobel IAR has been integrated into this new business unit.

For the Middle-East and North Africa, we will continue to work with our trusted distributor Chemical Partners Europe. For years, they have been our distributor for this region for the Hexion products and have now incorporated the former Akzo Nobel IAR products into their portfolio as well.

Trust to have informed you sufficiently.

Best regards,

Anne Hukkelhoven
Distributor Representative
Hexion Specialty Chemicals
Ink & Adhesive Resins
